Objective

"Experienced Laravel Developer with a solid track record of building and maintaining dynamic web applications. Looking to leverage my expertise in Laravel, RESTful APIs, and modern front-end integration to drive project success and innovation.".

Experience

- **Kalyanak software's**   Aug 2023 - Present
  Php laravel developer

  Responsibility
  Laravel Development: Design and develop robust, scalable, and efficient web applications.
  Implement new features and enhancements, ensuring code quality and adherence to coding standards.
  Database Management: Design and optimize database schemas for performance and reliability.
  API Development: Develop and maintain RESTful APIs to support front-end functionalities.
  Documentation:Create and maintain comprehensive documentation for code, processes, and procedures.
  Keep abreast of industry best practices and share knowledge within the team.
  Continuous Learning: Stay updated on the latest Laravel trends, technologies, and best practices.
  Proactively seek opportunities for skill enhancement and professional development.

- **IT-NetworkZ Infosystems Pvt Ltd**   Feb 2023 - June 2023
  Php laravel intern

Education

- **Inter Institutional Computer Center, Rashtrsant tukdoji maharaj nagpur University, Nagpur**   2023
  MCA
  82 %

- **Pushpak Mahavidyalaya, Umred**   2020
  BSc
  60 %

Skills

- Languages : C, C++, Core Java, Core php, Advance php
- Frontend : HTML, CSS
- Backend : PHP, MVC framework laravel
- Database : Mysql
- Client Side Scripting : JavaScript, JQuery, AJAX, React.Js
- API: JSON/Rest
- API Tool : Postman
- Framework : Laravel
- Version controller: Git, FileZilla

Projects

- **rspsim.com (developing as dedicated full stack developer)**
  The main aim of eSIM (embedded SIM) is to replace physical SIM cards with a digitally embedded chip that allows users to connect to cellular networks without needing a removable card.

  Laravel (Backend):
  Manages routing, database, and business logic.
  Blade templates for dynamic HTML.
  RESTful APIs for data exchange.

  HTML, CSS, Bootstrap (Frontend):

HTML structures the page.
CSS and Bootstrap style and ensure responsive design.
Bootstrap provides pre-designed UI components.

jQuery and Ajax (Interactivity):
jQuery simplifies DOM manipulation and event handling.
Ajax sends/receives data asynchronously for seamless updates.

JSON (Data Format):
Lightweight, structured data exchange between frontend and backend.

APIs:
Laravel APIs handle CRUD operations and send JSON responses.

- **shrutseva.com**
  A library management platform for organizing books, managing memberships, and handling borrowing/return records. Designed for Gujarati readers with an easy-to-use interface and smooth book tracking system.
- **Bazaarbhav**
  An online dictionary platform with improved UI and search functionality to find word meanings in Gujarati and Sanskrit, enhancing the user experience for language learners.
- **GS kosh.com**
  An online dictionary platform with improved UI and search functionality to find word meanings in Gujarati and Sanskrit, enhancing the user experience for language learners.
- **Ratnatryotsav— Dharmashala Management Module**
  A guesthouse management module with check-in/out, room service requests, and complaint handling to streamline guest interactions and improve service efficiency.
- **booktheplot.com – Real Estate Inventory Management System**
  - A platform for booking and managing plots with property listings, reservation flow, and an admin dashboard for management. Includes interactive booking using AJAX and smooth user experience with Blade templates.
